Which hex is right?

CODE · TOKENS.CSS

```
--color-accent-default:
#5b3be8;
```

FIGMA · AURORA / FOUNDATIONS

```
color.accent.default
= #6440f0
```

THE PROBLEM

Two sources of truth drift apart.

A designer changes a color in Figma. Nobody updates the CSS. Months later, reviews start with “which hex is right?”

From the Aurora example: 9 changed, 4 missing in code, 1 not in Figma.

HOW IT WORKS

One check. Every format you ship.

Figma variables are normalized once, then compared per mode with each target in your repo.

THE DESIGN DECISION

Compare color the way eyes do.

Not hex strings: distance in CIELAB with CIEDE2000. Under ΔE 1 counts as in sync. Above it, you see **by how much**.

color.bg.subtle dark		ΔE 1.4
color.accent.default light		ΔE 2.1
color.brand.300 tailwind		ΔE 6.9
color.accent.hover dark		ΔE 12.1

IN YOUR PULL REQUESTS

One comment. Always current.

The GitHub Action updates a single report on each PR and fails the check on drift. On a schedule, it opens the sync PR for you.

tokensync bot commented on pull request #128 · edited

tokensync · Aurora Design System

Design tokens drifted from Figma. 9 changed, 4 missing in code, 1 not in Figma · 55 in sync.

Target	Changed	Missing in code	Not in Figma	In sync
`src/styles/tokens.css` css	4	2	1	16
`tokens/primitives.tokens.json` dtcg	3	1	0	24
`tailwind.theme.json` tailwind	2	1	0	15

▼ **src/styles/tokens.css** — 7 differences · modes: light, dark

Changed (4)

Token	Mode	Code (now)	Figma (expected)	Δ
`color.accent.default`	light	`#5b3be8`	`#6440f0` → color.brand.600	ΔE 2.1

WHAT MAKES IT DIFFERENT

Sync changes values. Nothing else.

Comments, formatting, key order and value syntax stay exactly as you wrote them. Only the drifted values move.

src/styles/tokens.css — tokensync sync --write

```
  /* Accent */
- --color-accent-default: #5b3be8;
+ --color-accent-default: #6440f0;
  --color-accent-hover: #5130cc;
  …
  /* Radius */
- --radius-md: 6px;
+ --radius-md: 8px;
```

Dry run
by default. `--write` applies.

Exit codes
0 in sync · 1 drift
2 config error

Token-safe
Figma token never logged or printed.
